17<sup>th</sup> of February 2007  
Fulda, Germany

By joining the workshop you will...  
...and explore questions such as...

How do I start  
hosting conversations  
using games?

Learn how to use  
questions to make  
things happen

How could using  
dialogue games  
serve you and your  
work?

Connect with  
peers

Strengthen your  
facilitation  
competence

How could you also  
unfold dialogue in  
your work and life?

Bring back your  
own personal  
Question Game!

Why does the game  
format make a  
difference to the  
climate and outcome  
of conversations?

The site of the workshop will be a very special room, discovered by an artist of the region. After serving as an atelier the room now is transforming into a space for "Begegnungen" coming together.

The time of the workshop will be during the so called fifth season in Germany (Carnival) and the weekend will be the highlight of the regional festivities, offering some wonderful insights into the German culture and a special way to get to know each other in the evenings.

Fee: 200 € (We have scholarships available, please sent us an email if you are interested).

### What is purpose of the workshop?

The purpose is to give you deeper knowledge about questions & dialogue games.

A combination of theory, practice and reflection.

When you end the workshop you will have a first version of your own dialogue game that you can use where ever you want.

During the workshop you will also meet and connect with peers and get a chance to tap into a much wider pool of experience and practise around questions and dialogue games.

It is a chance to acquire new knowledge, a new tool, to unfold your current burning question and connect with a new global community of practitioners.

A chance to learn, reflect and get a tangible tool

### Where and when can you use dialogue games?

Dialogue games are especially useful for organisations, networks, groups or individuals, when you want to

- use or introduce group coaching
- deepen the understanding of and commitment to unfolding something in the organisation, network, group or your own life
- grow (new) relationships, teams and cross unit/sector cooperation
- master the skill of asking questions that matter and unfold actions,
- access more intelligences

In short - a new tool for project leaders, trainers, facilitators, managers, teachers and everyone who is keen on having more fruitful conversations in their work and daily life - conversations that matter and makes a difference.
